

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

PREFACE

TO THE

FIRST EDITION OF THE CATALOGUE.

THE Trustees of the late Lord Crewe's Estates are not willing that a Catalogue of the extensive and valuable Library, now deposited in Bamburgh Castle, should be made public without some account being prefixed of the manner in which they became possessed of it.

In the year 1778 the then Trustees laid the first foundation, by the purchase of the entire collection of the Rev. Thomas Sharp, Curate of Bamburgh, then lately deceased, and were thus enabled to offer to the neighbourhood, and particularly to the Clergy, the use of a considerable number of excellent books in all branches of literature. This purchase was made at an expense of £360, and a Librarian was afterwards appointed, as well for the care of the books as to attend to such applications as might be made for them. Some additions were occasionally made in subsequent years by the late Rev. Dr. John Sharp; but it was not till after his death, which happened April 28, 1792, that the Trust acquired the largest and most valuable part of this literary treasure, in virtue of those clauses in his last will and testament which are subjoined to this preface.

In this munificent donation is comprehended the most
